Master of Business Administration (MBA)

University of Washington Foster School of Business, Seattle, WA 2022

Bachelor of Science, Political Science and Psychology

University of Alabama, Tuscaloosa, AL 2016

EXPERIENCE

DELOITTE, Seattle, WA

Cloud Engineering Consultant

May 2022 – Present

I work as a consultant in Deloitte's Core Business Operations and Cloud Engineering portfolio, assisting clients across industries with systems integration tasks. I have experience in Active Directory, Systems Administration, Remote Desktop Protocol, and all local Windows system administration tools. Since February 2023 I have been working on various workstreams with a large manufacturing client as a technical resource within a large scale 5 year \$150M contract.

- Nominated and selected for internal leadership position as "*Seattle Lx Council Enrich Co-Lead*". In this internal role I help onboard new talent while continuing to deliver externally on tight timelines, and conduct market analysis and vendor management, etc. while providing world class customer service.
- Executed a portion of a sprint initiative for a major manufacturing client, facilitating the installation of the 21H2 Windows Update across 500+ workstations. By using Power Automate, I successfully deployed an automation in GCCHigh that enabled personal contact with 500+ users throughout the initiative, resulting in a successful uptake. Additionally I assisted in streamlining operations within their organizational Global Microsoft 365 Administrative Help Desk.
- Currently I provide application development support to a cloud migration project workstream. In this technical role, I deploy architectural solutions within AWS, make code changes to development and non-production .NET and Java based applications. I create and maintain secure network environments by leveraging virtualization, implementing SSL-based virtual hosts, and configuring ACLs. Manage production environments, deploy web applications on EC2 instances, and integrate them with on-premises systems.

UNITED STATES ARMY, Joint Base Lewis-McChord, WA

Battalion S6-Officer in Charge/ IT Project Manager

December 2020 – May 2022

Serve as the highest-ranking subject matter expert for all Army communication systems in a 500-person organization. Direct a team of 16 IT soldiers that manage the computer network, maintain accountability of radio equipment, and provide help-desk services. Enable planning of all operations through implementation and integration of communication.

- Executed monthly coaching sessions and annual performance evaluations for 2 senior team members. Coached non-commissioned officers (NCO) on techniques to evaluate performance and best practices for maintaining compliance with Communications Security (COMSEC) protocols.
- Influenced decision-making by producing executive summaries on trends of account creation, user compliance, and communication equipment serviceability and maintenance status. Utilizing SAP ERP software to accurately forecast and predict requirements.
- Enforced compliance with network protocols, preventing unauthorized use of secret and unclassified Army networks to ensure network security within the organization. Coordinated with the local SCCM to standardize workstation machine image across the organization.

Battery Executive Officer/ Assistant Manager Fort Stewart, GA

December 2017 – 2020 December 2020

Served as the second in command for a 100-person department. Oversaw and managed \$30M of organizational property and equipment. In addition, managed the department's maintenance plan for vehicles, weapons, and all repair parts.

- Provided guidance and detailed plans for equipment repair, setting goals for the team and overseeing equipment maintenance within the department. Achieved the highest number of fully mission-capable cannons within the organization, leading to a nomination for the Chief of Staff (CSA), Army Award for Maintenance Excellence (AAME).
- Regularly inventoried property and submitted redundant equipment to the Defense Logistics Agency (DLA), saving \$100k and increasing operational efficiency, using SAP Enterprise Resource Planning (ERP) Software GCSS-Army to validate and process transactions.
- Personally developed technical IT hands-on technical training by: overseeing the 100 person department's network and physical workstations, earning my CompTIA Security + certification, and earned the position of third overall student in my 6 month long Military IT training course from December 2020-June 2020 at the *U.S. Army Signal Captain's Career Course* in Ft. Gordon, GA

Fire Support Officer/ Team Leader Fort Stewart, GA

May 2016 – 2017 December

Led a 4-person team that integrated the indirect fire of 120mm mortars and 150mm cannons in support of an infantry company of 100 people and ensured the safety of teammates during dangerous live-fire exercises. In addition to supporting the maneuver of the ground commander

- Partnered with Republic of Korea soldiers during a deployment to Korea, and trained team to successfully integrate indirect fires plans with their exercises. Resulting in a real-world deployable 4-person target acquisition unit trained and proficient near the Korean DMZ
